- GitHub
- Heroku
- Insomnia
- VS Code
- Sequelize

COLLABORATIVE PROJECTS

DOG-BLOG

DESCRIPTION: Blog application from the point of view of your favorite furry friend.

Application was created using MVC framework. As the person responsible for the backend of the application, I worked with the models and controllers testing the routes through insomnia. Once complete we deployed through heroku.

HOOK-EM-UP

DESCRIPTION: Ecommerce application to buy and sell UT related memorabilia

Application created using MERN tech stack. As the person responsible for the frontend of the application. I worked with REACT.JS to create a responsive user friendly interface. Once complete we deployed through GitHub Pages.

EXPERIENCE

CVS SHIFT-SUPERVISOR

(09-05-19/01-26-2022)

- Managed shift records, producing timely reports to keep management up-to-date and documented transactions to promote inventory accuracy.
- Coordinated workflow and maintained schedules to improve efficiency, while assessing team performances to encourage productivity.
